

INSTALLATION

Install as many prepaid sub meters as required per property whilst retaining your power supplier meter to measure your main supply.

Metro Prepaid sub meters are coded for use on the **Metro Prepaid** vending network only.

Sub meters may be installed by any qualified electrician. The installation must comply with BS 7671 (IET wiring regulation).

Metro Prepaid registered sub meters must be installed below or "downstream" of the main power suppliers meter

Existing Power Supplier

REGISTRATION

Metro Prepaid register each prepaid sub meter to the landlord of the property where it is installed. Join the hundreds of property owners that register sub prepaid meters with us every month.

Registration can be done via email, phone or on-line with our Help Desk in as little as 10 minutes.

Registration information includes:

- Property address
- Property owner name, date of birth, contact number & email address
- Nominated bank account to receive payment
- Details of the main power supply

COLLECT PAYMENTS / CONTROL USAGE

WHO ARE WE

Metro Prepaid helps Landlords collect electricity payments from their tenants using prepaid sub meters.

Metro Prepaid meters are available through a national network of electrical wholesalers and retailers in the UK.

Landlords use their own electricians to purchase and install the prepaid meters at their premises, thereby minimising their installation costs.

Metro Prepaid then collects electricity usage payments from tenants by vending top-up vouchers (secure 20 digit power codes), which are keyed into the prepaid meter by the tenants.

Top-up Power Codes are available through the PayPoint store network (29,000 stores), or on-line using any debit or credit card.

The proceeds from the sale of power codes for each calendar month are accumulated & repaid to the Landlord in the first week of the following month. The Landlord uses the funds to defray its bills from its main power supplier.

Metro Prepaid meters are suitable for:

- HMOs (houses of multiple occupation)
- Outside rooms and sheds
- Units and flats
- Caravan parks & boat moorings
- Multi-tenanted commercial buildings

where Landlords supply electricity to their tenants from their main supply.

Prepaid solutions in association with:

BUYING POWER CODES

Tenants may select one of the following options to obtain power codes to recharge their meters:

TESCO

ASDA
part of the WAL-MART family

Sainsbury's

SPAR

McColl's

see www.paypoint.com for a full list of stores by postcode

ADVANTAGES TO LANDOWNERS

- The benefits of prepaid coin, card and credit meters all in one meter
- Instant control over bills
- Option to set your tariff so that tenants pay the Metro Prepaid service fee
- Improved cash flow electricity used through the meter paid back to the owner
- Comprehensive reporting available
- Collect payments without regular property visits or time consuming admin.

ADVANTAGES TO TENANTS

- Help Desk on standby daily including weekends from 7am to 6pm to resolve any metering issues
- Convenient token purchase options available
- Numeric power codes printed at point-of-purchase
- No unexpected large bills
- Usage awareness helps reduce consumption
- Power codes are unique to your meter and very secure
- No need for coins / change

ADVANTAGES TO ELECTRICIANS

- Cheaper meters and faster installation
- Buy the meter on your wholesaler account
- Value added product for property owners
- Technical support available 7 days per week

When a power code is purchased, the code is printed on a cash slip or sent by text. This power code is then keyed into the secondary meter and the meter is recharged.
